Art

I'm looking forward to a great year of exploring different types of art with IDA students! We will tentatively be going on a few field trips to meet artists, and see first hand their techniques. The older classes will be assigned a list of required photos to take, that they will later use to develop their skills with pencil drawing, watercolors and acrylics. Just to dabble in the different types of art mediums help us learn what we enjoy and perhaps develop a rewarding hobby. Later in the year we will also be looking at the history of art and try to recreate some of our own masterpieces". Mrs. Zimmermans' class will also have some field trips where they will collect nature to create beautiful art projects. We will also be getting messy with paper mache...so remember we need an "art shirt" to protect our uniforms;) There will be a geometric animal project that will help teach the importance of color placement. I look forward to spending time with each student, exploring that we are all designed with unique interests that impact how we express artistically. I look forward to the new year and all the possibilities.
